

Terms and conditions of the project	This document (the contract) is drawn between one (or more) member(s) of faculty (the supervisor(s)) and a student (the student). It contains binding and final information relating to the completion of a senior project within the department. Failure to satisfy any set deadlines and/or objects and/or deliverables, constitutes breach of contract that will lead to project abandonment and/or a failing grade																		
The supervisor(s):	Agrees and promises to: help the student with their project; guide the student through any difficulties; provide pointers and suggestions on how to continue and eventually complete the work; support the student; review all submissions in a timely fashion and provide a meaningful educational experience																		
Project grading:	Grading can be allocated by the supervisor according to the following table:																		
	<table><thead><tr><th>Item</th><th>Description</th><th>Min (%)</th><th>Max (%)</th></tr></thead><tbody><tr><td>Objectives, project deliverables</td><td>As detailed in the project contract</td><td>65</td><td>85</td></tr><tr><td>Report (thesis / write up)</td><td>Conformity, completeness, correctness, originality</td><td>10</td><td>25</td></tr><tr><td>Presentation (demo)</td><td>Conformity, completeness, answering</td><td>5</td><td>10</td></tr></tbody></table>	Item	Description	Min (%)	Max (%)	Objectives, project deliverables	As detailed in the project contract	65	85	Report (thesis / write up)	Conformity, completeness, correctness, originality	10	25	Presentation (demo)	Conformity, completeness, answering	5	10		
Item	Description	Min (%)	Max (%)																
Objectives, project deliverables	As detailed in the project contract	65	85																
Report (thesis / write up)	Conformity, completeness, correctness, originality	10	25																
Presentation (demo)	Conformity, completeness, answering	5	10																
	Please use the 'objectives' subsection in the 'Project details' section of this contract and allocate weights accordingly.																		
The student:	Agrees and promises to: undertake this project; invest the agreed upon effort; submit any required material and generate any deliverables (software, hardware and documentation); work on the project on their own under the guidance of the supervisor(s); maintain the momentum of the project; be in frequent contact with the supervisor(s); find panel member(s); present the work.																		
Notes for the student:	1) in order to register you must present (even by email) this (signed) contract to the program coordinator for them to sign the add/drop form and 2) you must register in the first two weeks of the semester 3) in order to obtain a grade you must deliver all 3 items mentioned in the project grading above																		
Date:	The project contract was signed on: Click or tap to enter a date.

<i>You may also use this form to complete ONLY this section and submit the document as a proposal for a project</i> Project details Enter the details of the project.	This project is suitable for students of the following degrees (tick all that apply): ☐ Computer Science ☐ Cybersecurity ☒ Artificial Intelligence ☐ Occupational safety and health ☐ Disaster risk reduction and security management Title: An AI robotic system that will identify fire occurrence in various environments Description: This project aims to develop an AI-enabled robotic system that will use temperature, humidity and gas sensors as well as location based information to distinguish when a fire is occurring or if the alarm is due to other aspects such as car exhaust fumes. Workload (student agrees to invest) : Click and enter the hours per week per week <u>Objectives (worth and/or deadlines):</u> 1. Develop the robotic platform 25% 2. Test thresholds in various environments (city, forest, building) 15% 3. Use AI to distinguish between different triggers (20%) 4. Correctly identify fire occurrence in various environments (15%) 5. Writeup and presentation 25% 6. Click here to enter text. 7. Click here to enter text.			
Considerable progress:	What must be completed by the end of the first semester in order for the project to continue and complete? Please refer to the above mentioned objectives and be as specific as possible. 1, 2 Additionally: An interruption of the project work flow along with absence from regular reporting for a maximum period of FOUR WEEKS without any justifiable cause and subject to no prior approval by the department/supervisor where applicable, will automatically result in awarding an “F”.			
Deadlines and Deliverables:	What needs to happen for the project, when and how? This project starts on Fall semester (R1P) 2025. This project finishes in one calendar year after the project start. The student must:			
Step /Item	Do what	Complete / submit by	Inform / submit to	How
1	Submit interim report [optional]	End of semester of registering	Supervisor	Email
2	Create the panel (i.e. find panel member)	End of semester of registering	Supervisor & Program coordinator	Email
3	Submit draft report (85%+) for review	Friday, 10 weeks before the presentation	Supervisor	Email & Blackboard
4	Submit thesis (after supervisor review) to 2 nd marker (panel)	Friday 5 weeks before the presentation	2 nd marker (panel member)	Blackboard

5	Submit finalised project documentation	Monday before the presentation	Program coordinator	Blackboard submit
6	Presentation, 25-minute talk and Q&A	Friday, before the semester starts, almost one calendar year after original registration: 02/10/2026	Whole department	Physical
